Họ và tên: Đặng Nguyễn Phước Duyên
Lớp: 13_CNTT3
MSSV: 1350080043

Bài 1:

```
interface Mail {

    void sendMail();
    void log();
}
Class MailImpl implements Mail {
@Override
    public void sendMail () {
System.out.println("Đây Gửi Mail");
@Override
    public void log(); {
    System.out.println("Đang ghi log....");
    }
}
class Main {
public static void main(String[] args){
MailImpl mail = new MailImpl();
```

```
mail.sendMail();
mail.log();
```

Bài 2:

```
~~abstract class Shape~~
interface Shape {
void getArea();
void getPerimeter();
} ~~void draw~~ String color = "red"; void draw();
class Rectangle implements Shape
~~public void getArea~~ ()
@ ~~Override~~
~~public void getArea~~
public float width;
public float height;
public void getSize() {
return size
} @ Override
public void getArea() {
return "Dien tich" "Chu vi";
} @ Override
public void getPerimeter() {
```

```
    return "Diện tích"
}
  ~~public void~~
  @Override
  public void draw(){
    system.out.printh("Draw" + color+"
rectangle-" ); }
raw(), public class Circle implements Shape
  @Override
    public void getArea(){
    return "Chu vi" ;
}
    public void getPerimeter
      return "Diện tích";
}
Bài 3;
abstract class PhuongTienDiChuyen {
  protected String loaiPhuongTien;
  ~~protected~~
  void batDau();
  void tangToc();
  void dungLai();
```

Bài 3:

```
abstract double layVanToc();
public string layTenHangSanXuat();
class HangSanXuat {
  private String tenHangSanXuat;
  private String tenQuocGia;
}
abstract class PhuongTienDiChuyen {
extends HangSanXuat
  protected string loaiPhuongTien;()
  @ Override
  private string tenHangSanXuat;
  void BatDau();
  void tangToc();
  void dungLai();
  abstract double layVanToc();
public class MayBay extends PhuongTi
phuongTienDiChuyen {
  private String loaiNhienLieu
  public void catCanh();
  public void haCanh();
  @ Override
  public double layVanToc()
System.out.println("Vận tốc của máy bay")
```

```
public class XeOto extends PhuongTienDi
Chuyen {
  ~~private loaiNhienLieu~~
  private String loaiNhienLieu
  @Override
  public double layVanToc() {
  System.out.println("Vận Tốc Xe Ôtô");
}
public class XeDap extends PhuongTienDiChuyen
{ @Override
  public double layVanToc() {
  System.out.println("Vận Tốc Xe Đạp");
}
```

Bài4:

```
Class Car {
  protected String color;
  protected ~~Stri~~double speed;
  private void accelerate();
  public ~~getColor~~ String getColor() {
    return "đỏ";
}
```

THINH HUNG
Printing & Paper

```
public double getSpeed (){
    return spp speed;
}.
public class Bmw extends Car {
  @ Override
  public void accelerated () {
  System.out.println ("accelerate"); }
  public String toString ();
}
public class Civic extends Car {
  @ Override
  public void accelerate () {
  System.out.println("accelerate Civic"); }
  public string toStrings ();
}
```

Bài 5:

```
interface Movable {
void moveUp ();
void moveDown ();
void moveLeft ();
void moveRight (); }
```

Tiên học lễ, hậu học văn

THINH HUNG
Printing & Paper

System.out.print...

```
class Moveable Circle implements Mov
Moveable
 public int radius,
 Class MoveablePoint implements Movabl
  public int x;
  public int y;
  public int xSpeed;
  public int ySpeed;
  public MoveablePoints (int x; int y;
int xSpeed; int ySpeed)
  public String toStrings(){
   return String.format("(%d, %d)
 speed = (%d, %d)", x, y, xSpeed, y
 ySpeed);
  }
  @Override
  public void moveUp(){
 System.out.println("Di lên"); } @Override
  public void moveDown(){
  System.out.println("Di xuống");}
  public void moveLeft(){
```

Nghị lực và bền bỉ có thể chinh phục mọi thứ
THÀNH HƯNG

```
System.out.println("Di trái"); }
public void moveRight {
System.out.println("Di phải"); }
public class MoveableCircle implements
Moveable {
  private ~~radius~~ int radius,
  private Moveable center;
  public MoveableCircle(int x, int y, int
xSpeed, int ySpeed, int radius) {
    this.center = new MoveablePoint(x, y
, xSpeed, ySpeed);
      this.radius = radius; }
  public String toString() {
      return "Circle" + center.toString() +
  " radius=" + radius; }
  @ Override
  public void moveUp () {
  center.moveUp (); }
  @ Override
  public void moveDown() {
  center.moveDown (); }
```
